

# Time delay relays

12 to 230 V $\sim$  and =

Dimensions **see e-catalogue**

For controlling the switching ON or OFF of a circuit (lighting, ventilation, automation, signalling) in operation for a specific time from 0.1 sec to 100 hrs  
 Supply voltage: 12 to 230 V $\pm$  (50/60 Hz) and =  
 Output: 8 A - 250 V $\pm$  -  $\mu$  cos = 1 per inverter contact

| Pack | Cat.Nos  | Time delay relays  | Number of modules | Pack | Cat.Nos  | Time delay relays (continued)   | Number of modules |
|------|----------|--|-------------------|------|----------|---|-------------------|
