

USB-C/USB-A accessories

A single standard for connectors and ports

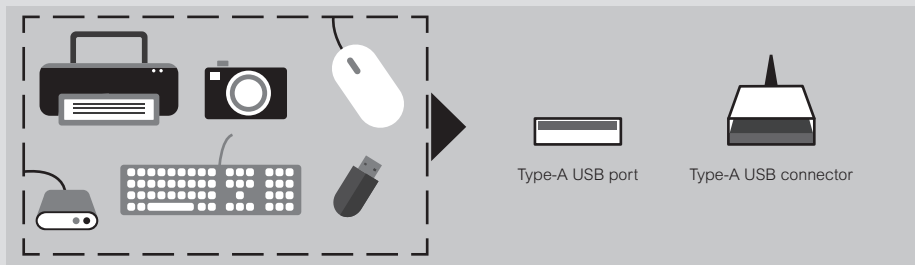

Data/video exchange and charging are now facilitated thanks to a single standard of ports and connectors
The Type-C USB connector now equips most of laptops and smartphones

Type-C USB new equipment and Type-A USB devices

Type-C: computers, tablets and smartphones are now equipped with Type-C USB ports **only**

Type-A: devices such as printers, cameras, computer mouses and keypads remain equipped with Type-A USB ports

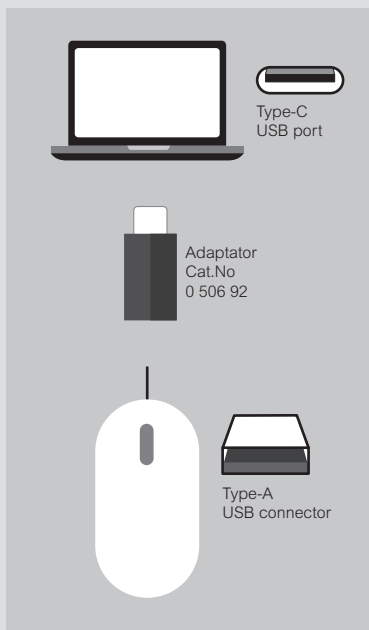

When these Type-A USB devices need to be connected to Type-C USB equipment, see below the new solutions and devices proposed by Legrand

Examples of Type-A USB connections to Type-C USB / Micro-USB / Lightning devices

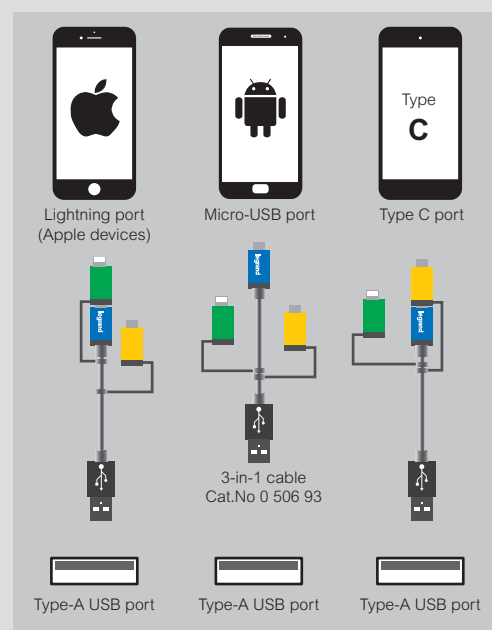

Type-A > Type-C

Use adaptor Cat.No 0 506 92 to connect a Type-A mouse to a Type-C computer

Type-A > Lightning / Micro-USB / Type-C

When a smartphone is equipped with a Lightning (Apple), Micro-USB or Type-C port, use the 3-in-1 USB cable Cat.No 0 506 93 to connect it to Type-A USB devices

Type-C > Type-C / Type-A

Use the USB Hub adaptor Cat.No 0 506 94 to connect one Type-C device and up to three Type-A devices to a Type-C computer
