

Firmware Release Notes

Version: 4.0.34 / Build 50319/ Release Notes

Release Status: General Availability (GA)

Date: March 29, 2024

Release Overview

4.0.34 Firmware is a **General Availability (GA) Release** for Linkeo Data Center. This release may include performance and productivity improvements, support for new products and accessories, new features and enhancements, bug fixes, and general fixes for specific model families.

Applicability

This firmware release applies to the following products.

<i>Product Group</i>	<i>Model</i>
PDU's	Linkeo Data Center
Sensors	Legrand wireless sensors for PDU's

General Guidelines for this Release

Some custom-engineered models may not be supported by this release. Please check the **Support & Compatibility** section below. Or contact Legrand Support if you are unsure of the model number of your unit—it is typically viewable from the GUI's *Device Information* page and is also printed on a label located on the device.

Note: Do NOT upgrade ANY other Legrand model(s) to 4.0.34 Firmware (other than what is listed in the Applicability table above) because the unit may either not be compatible with this Firmware or may have been built after this release entered our System Tests and installing it may result in the unit becoming non-functional.

Note: Do NOT downgrade your new product(s) to any prior-Firmware release. Due to significant internal enhancements in 4.0.34, a downgrade from Release 4.0.34 Build 50319 to ANY prior firmware release is NOT SUPPORTED. Please contact Legrand Support with any questions.

Release Highlights

New Features & Enhancements

<i>Issue ID</i>	<i>Description</i>
82910	Show battery level of Zigbee sensors.
82911	Configurable alert/event for low battery.
