

Firmware Release Notes

Version: 4.0.36 / Build 52138/ Release Notes

Release Status: General Availability (GA)

Date: March 27th, 2026

Release Overview

4.0.36 Firmware is a **General Availability (GA) Release** for NX1. This release may include performance and productivity improvements, support for new products and accessories, new features and enhancements, bug fixes, and general fixes for specific model families.

Applicability

This firmware release applies to the following products.

<i>Product Group</i>	<i>Model</i>
PDU's	NX1
Sensors	Legrand wireless sensors for PDU's

General Guidelines for this Release

Some custom-engineered models may not be supported by this release. Please check the **Support & Compatibility** section below or contact LDCS Europe Support if you are unsure of the model number of your unit—it is typically viewable from the GUI's *Device Information* page and is also printed on a label located on the device.

Note: Do NOT upgrade ANY other Raritan model(s) to 4.0.36 Firmware (other than what is listed in the Applicability table above) because the unit may either not be compatible with this Firmware or may have been built after this release entered our System Tests and installing it may result in the unit becoming non-functional.

Note: Do NOT downgrade your new product(s) to any prior Firmware release. Due to significant internal enhancements in 4.0.36, a downgrade from Release 4.0.36 Build 52138 to ANY prior firmware release is NOT SUPPORTED. Please contact LDCS Europe Support with any questions.

Release Highlights

New Features & Enhancements

<i>Issue ID</i>	<i>Description</i>
86628	The delivery of this intermediary firmware is essential for managing the transition from versions 4.0.xx to the coming 4.3.50 release and beyond. It includes the updated Base Firmware and Bootloader, ensuring your system is ready for future updates. Once you have upgraded to version 4.0.36, we strongly recommend proceeding to version 4.3.50 as soon as it is available to ensure full performance. The 4.0.36 version does not allow firmware downgrading.

Please consult the appropriate User Guide for more information on these firmware features at <https://www.legrand.com/datacenter/int-en/raritan-pdu-support>

Upgrade Matrix (Path for Upgrades)

This firmware release is intended for factory shipments and firmware upgrades on the units/models stated in the Applicability table above.

<i>Firmware Version</i>	<i>Upgrade Steps</i>
4.0.3x	» 4.0.36
