

Hotel Supervision Software

1 LIST OF CATALOGUE REFERENCES:

3544SW

2 ATTENTION

- Software is intended to manage up to 20 rooms.

- To ensure compatibility and optimal performance, it is necessary to upgrade system components according to the following table:

Software / Firmware	Required Version
Hotel Supervision	2.5.X or higher
MyHotel_Suite	5.0.7 or higher
MH201 Firmware	3.5.X or higher

NOTE: If you replace any MH201 with a new MH201 running Firmware version 3.5.X or higher, you must update all remaining MH201 units in the installation.

- To use the Supervision Software, you need to purchase the cards containing the unlocking codes.

- The password to enter the first time the software is started is “**admin**”

3 MINIMUM PC REQUIREMENTS

3.1 SUPERVISION SERVER

Requirement	Description
Operating System	Windows 10
Architecture	64bit
.Net framework	4.0 or higher
Processor	Performance equivalent to or better than Intel core i5
RAM	8 GB
Hard Disk	2 GB free
Display	1366 x 768 but recommended 1920 x 1080

3.2 SUPERVISION

Requirement	Description
Operating System	Windows 10
Architecture	64bit
.Net framework	4.0 or higher
Processor	Performance equivalent to or better than Intel core i3
RAM	8 GB
Hard Disk	2 GB free
Display	1366 x 768 but recommended 1920 x 1080

Please be aware that Windows 10 operating system will receive frequent hardware driver and software updates following its release; this may affect software compatibility.

4 VERSION HISTORY

Version	Release Date	Changelog
4.0.15	10 / 12 / 2015	Fixed an occasional problem during setting of hours
4.0.14	27 / 11 / 2015	New function: - Control of Nuvo audio system
3.0.13	19 / 11 / 2014	Added visualization of Eco / Comfort modalities of the thermostats H4691, LN4691, 067459, 64170 Minor bug fixes
3.0.9	24 / 01 / 2014	Minor bug fixes
3.0.8	19 / 09 / 2013	Added default page management Added in energy management 2 thresholds and related Bip/colors Added management of new actuators Added management of radio source up to 15 stations Several minor optimizations
