LEGRAND'S ENVIRONMENTAL COMMITMENTS

Incorporate environmental management into our industrial sites

Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).

• Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

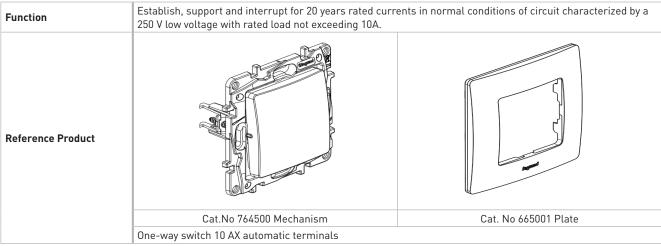

• Involve the environment in product design and provide informations in compliance with ISO 14025

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

PRODUCTS CONCERNED

The environmental data is representative of the following products:

CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EU amended by delegated directive (EU) 2015/863, and its amendment 2017/2102/EU

Total weight of Reference Product	96 g (all p	ackaging included)			
Plastics as % of weight		Metals as % of weight		Other as % of weight	
PC	22.0 %	Steel	8.4 %		
ABS	18.7 %	Copper alloy	1.8 %		
PS	<0.1 %	Silver alloy	<0.1 %		
		Other metal	<0.1 %		
	I	Packaging as %	% of weight	1	
PP	3.7 %			Wood	26 %
PE	0.2 %			Paper	19.2 %
Total plastics	44.6 %	Total metals	10.2 %	Total others	45.2 %

Estimated recycled material content: 20 % by mass.

MANUFACTURE

This Reference Product comes from a site that has received ISO14001 certification.

DISTRIBUTION

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 780 km by road from our warehouse to the local point of distribution into the market in Europe.

Packaging is compliant with european directive 2004/12/EU concerning packaging and packaging waste. At their end of life, its recyclability rate is 90 % (in % of packaging weight).

For the installation of the product, only standard tools are needed.

USE

Under normal conditions of use, this product requires no servicing, no maintenance or additional products.

Product Environmental Profile

Niloé™

One-way switch 10 AX automatic terminals

END OF LIFE I

The product end of life factors are taken into account during the design phase. Dismantling and sorting of components or materials is made as easy as possible with a view to recycling or failing that, another form of reuse. This product falls within the scope of the WEEE directive (2012/19/EU). Therefore it must be processed through local WEEE recycling/recovery channels.

• Extended producer responsability:

The sale of this product is subject to a contribution to eco-organisations in each country responsible for managing end of life products in the field of application of the European Waste Electronic and Electrical Equipment Directive.

• Recyclability rate:

Calculated using the method described in technical report IEC/TR 62635, the recyclability rate of the product is estimated at 93 %. This value is based on data collected from a technological channel operating on an industrial basis. It does not pre-validate the effective use of this channel for the end of life of this product.

Separated into:

 plastic materials (excluding packaging) 	: 39 %
 metal materials (excluding packaging) 	: 10 %
- packaging (all types of materials)	: 44 %

- packaging (all types of materials)

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end of life. It is representative from products marketed and used in Europe, in compliance with the local current standards

For each phase, the following modelling elements were taken in account:

Manufacture	Materials and components of the product, all transport for the manufacturing, the packaging and the waste generated by the manufacturing.			
Distribution	Transport between the last Group distribution centre and an average delivery point in the sales area.			
Installation	The end of life of the packaging.			
Use	 Product category: PSR0005-ed2-2016 03 29 - § 3.5 Switches Use scenario: Use scenario : non-continuous operation for 20 years at 50% of rated load, during 30% of the time. This modelling duration does not constitute a minimum durability requirement. Energy model: Electricity Mix; Europe 27 - 2008. 			
End of life	The default end of life scenario maximizing the impacts.			
Software and database used	EIME & database CODDE-2018-11

Water pollution	2.09E+02	m ³	1.09E+02	52 %	6.25E-01	< 1 %	4.33E-01	<1 %	9.82E+01	47 %	6.22E-01	<1 %
Air pollution	1.39E+02	m ³	3.57E+01	26 %	6.25E-01	< 1 %	2.49E-01	<1 %	1.02E+02	74 %	5.94E-01	<1 %

The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of pep-ecopassport.org website.

The environmental impacts are calculated for a

configuration composed by a switch with a rocker and a plate (Reference Product).

For color configurations different from that of the Reference Product, take the same value as the Reference Product for each environmental impact at each phase of the lifecycle.

For a 2 way switch configuration the environmental impacts of each phase of the lifecycle are obtained by adopting the following coefficients on those of the Reference Product.

	Total LCA	Manufacturing	Distribution	Installation	Use	End of life
Global warming	1.4	1.0				
Ozon depletion	1.4	1.0				
Acidification of soil and water	1.4	1.1				
Water eutrophication	1.1	1.0	1			
Photochemical ozon formation	1.4	1.0	1			
Depletion of abiotic resources - elements	1.4	1.4	1.0	1.0	1.4	1.0
Total use of primary energy	1.4	1.0				
Net use of fresh water	1.4	1.1	1			
Depletion of abiotic resources - fossil fuels	1.4	1.0	1			
Water pollution	1.2	1.0				
Air pollution	1.3	1.0]			

Moreover, for the multi-gang configurations, the described environmental impacts of 1 way or 2 way switches have to be multiplied by the number of installed products.
