

### ■ LEGRAND'S ENVIRONMENTAL COMMITMENTS

- Incorporate environmental management into our industrial sites

Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).

- Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

- Involve the environment in product design and provide informations in compliance with ISO 14025

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

### ■ REFERENCE PRODUCT

<b>Function</b>	The Auto-adjustable backbox allows to reserve a place in the concrete to be poured (screed thickness from 65mm to 90mm), in order to install a floor box (standard or flush version with a wiring devices capacity of 8 modules in vertical position or 12 modules in horizontal position) for 20 years, once the concrete is dry.
<b>Reference Product</b>	
	<b>Cat.No 0 880 90</b> <b>AUTO-AJUSTABLE BACK BOX 8/12M</b>

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

### ■ PRODUCTS CONCERNED

The environmental data is representative of the following products:

# Product Environmental Profile

## Legrand AUTO-AJUSTABLE BACKBOXES

### CONSTITUANT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EU amended by delegated directive (EU) 2015/863, and its amendment 2017/2102/EU.

<b>Total weight of Reference Product</b>	<b>1.88 kg</b> (all packaging included)		
--	---	--	--

<b>Product alone weight 1.50 kg</b>			
<b>Plastics as % of weight</b>	<b>Metals as % of weight</b>	<b>Other as % of weight</b>	
ABS	4.7 %	Steel	74.9 %
PE	<0.1 %		

<b>Packaging (alone) : 0.38 kg</b>				
<b>PE (Packaging)</b>	<b>&lt;0.1 %</b>		<b>Cardboard</b>	<b>15.4 %</b>
			Wood	4.8 %
			Paper	0.2 %

<b>Total plastics : 0.09 kg</b>	<b>4.7 %</b>	<b>Total metals : 1.41 kg</b>	<b>74.9 %</b>	<b>Total others : 0.38 kg</b>	<b>20.4 %</b>
---------------------------------	--------------	-------------------------------	---------------	-------------------------------	---------------

At the date of edition of this document, the content of recycled material(s) is :

- Product alone (excluding packaging): 16% by mass
- Packaging only: 65% by mass

### MANUFACTURE

This Reference Product comes from a site that observe the applicable legislation for industrial sites. The final assembly site is located at Amancey, France.

### DISTRIBUTION

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 1325 km by lorry from our warehouse to the local point of distribution into the market in Europe. Packaging is compliant with european directive 2004/12/EU concerning packaging and packaging waste.

### INSTALLATION

For the installation of the product, only standard tools are needed.

### USE

Under normal conditions of use, this product requires no servicing, no maintenance or additional products.

### END OF LIFE

The product end of life factors are taken into account during the design phase. Dismantling and sorting of components or materials is made as easy as possible with a view to recycling or failing that, another form of reuse.

The sale of this product is subject to a contribution to eco-organisations in each country responsible for managing end of life products in the field of application of the European Waste Electronic and Electrical Equipment Directive.

### ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end of life. It is representative from products marketed and used in Europe, in compliance with the local current standards  
All the data collected in this PEP is representative of the year 2025..

For each phase, the following modelling elements were taken in account:

<b>System Limit</b>	<b>Manufacture A1-A3</b>	Materials and components of the product, all transport for the manufacturing, the packaging and the waste generated by the manufacturing.
	<b>Distribution A4</b>	Transport between the last Group distribution centre and an average delivery point in the sales area.
	<b>Installation A5</b>	The end of life of the packaging.
	<b>Use B1-B7</b>	<ul style="list-style-type: none"><li>Product category: backbox for floor boxes.</li><li>Use scenario: no energy consumption during the 20 years working life. This modelling duration does not constitute a minimum durability requirement.</li><li>Energy model: Electricity Mix_Low voltage_2022_France_FR - 2022.</li></ul>
	<b>End of life C1-C4</b>	Choice of end-of-life by default model for PCR-ed4-EN-2021 09 06>
	<b>D Module</b>	Module D is calculated according to PCR-ed4-EN-2021 09 06 based on the materials recycled and the modelled end-of-life scenario. It expresses the net benefits and burdens beyond the boundaries of the system, and are not to be included in the life cycle totals.
	<b>Software and data-base used</b>	EIME V6 & its database 2025-04-15 The set of indicators used is Indicators for PEF EF 3.1 (Compliance: PEP ed.4, EN15804+A2) v2.0

Unless otherwise indicated the modelling energetic mix are those integrated in the data modules used from the aformentioned database.
