Product Environmental Profile

CONTROL DEVICE WITH INTEGRATED WEBSERVER FOR LEGRAND ADDRESSABLE EL UNITS

LEGRAND'S ENVIRONMENTAL COMMITMENTS

▪ **Incorporate environmental management into our industrial sites**
Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).

▪ **Offer our customers environmentally friendly solutions**
Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

▪ **Involve the environment in product design and provide informations in compliance with ISO 14025**
Reduce the environmental impact of products over their whole life cycle.
Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

Function	Allows centralisation of the operating status of each addressable SATI security block in a maximum of 1023, possibly supplemented by repeaters depending on the number of security blocks or the topology of the installation for 10 years according to the 802.11b/g/n Wi-Fi 4 2.4 Ghz standard.
Reference Product

CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market.
It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EU amended by delegated directive (EU) 2015/863, and its amendment 2017/2102/EU.

Total weight of Reference Product	**0.55 kg** (all packaging included)

Product alone weight 0.31 kg					
Plastics as % of weight		**Metals as % of weight**		**Other as % of weight**	
PC	**13.6 %**	Steel	**<0.1 %**	Electronic board	**30.8 %**
ABS	**6.0 %**			Battery LFP	**3.8 %**
PET	**1.0 %**				
Various plastics	**0.4 %**				

Packaging (alone) : 0.25 kg					
PE	**0.1 %**			Wood	**25.1 %**
				Cardboard	**16.1 %**
				Paper	**3.1 %**

Total plastics : 0.12 kg	**21.1 %**	**Total metals : <0.01 kg**	**<0.1 %**	**Total others : 0.44 kg**	**78.9 %**

At the date of edition of this document, the content of recycled material(s) is :

- Product alone (excluding packaging): 0% by mass
- Packaging only: 36% by mass

MANUFACTURE

This Reference Product comes from sites that have received ISO14001 certification.
The final assembly site is located at Lagord in France.

DISTRIBUTION

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 19000 km by boat and 1000 km by truck from our warehouse to the local point of distribution into the market in the world.

INSTALLATION

For the installation of the product, only standard tools are needed.

USE

Under normal conditions of use, this product requires maintenance. The battery will be replaced once during the lifetime of the product.
Maintenance involves an average 10 km round trip by car to replace the battery.

END OF LIFE

The product end of life factors are taken into account during the design phase. Dismantling and sorting of components or materials is made as easy as possible with a view to recycling or failing that, another form of reuse.

PEP ecoPASSPORT®

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end of life. It is representative of products marketed and used in France in an electrical installation in compliance with NF C 15100 and associated product standards.
The datasets collected in this PEP are representative of the year 2025.

For each phase, the following modelling elements were taken in account:

System Limit	**Manufacture A1-A3**	Materials and components of the product, all transport for the manufacturing, the packaging and the waste generated by the manufacturing.
	Distribution A4	Transport between the last Group distribution centre and an average delivery point in the sales area.
	Installation A5	The end of life of the packaging.
	Use B1-B7	▪ Product category: active product. ▪ Use scenario: For 10 years of continuous operation at 100% of rated load (9.2 W at 230 V) for 100% of the time. This modelling time is not a minimum durability requirement. ▪ Energy model: Global - 2020.
	End of life C1-C4	The default end-of-life scenario in accordance with appendix D of PCR ed4. The default end-of-life scenario for batteries according to PSR 0007.
D Module		Module D is calculated according to PCR-ed4-EN-2021 09 06 based on the materials recycled and the modelled end-of-life scenario. It expresses the net benefits and burdens beyond the boundaries of the system, and are not to be included in the life cycle totals.
Software and database used		The set of indicators used is Indicators for PEF EF 3.1 (Compliance: PEP ed.4, EN15804+A2) v2.0 EIME V6 and its CODDE-2024-04 database

Unless otherwise indicated the modelling energetic mix are those integrated in the data modules used from the aforementioned database.
