1. USE

DLP-S trunking offers:

- the distribution, the protection and the derivation of the various cables in an electrical installation.
- trunkings, finishing accessories (end, joint of lid, joint of body, interior angle, exterior angle, flat angle, derivation)
- all the easy ways/advantages for the installation.
- comply with the standard EN 50085-2-1, safety and technical performance.
- a flexibility with the installation and maintenance:

5 references of trunkings delivered with a cover of 45/75mm:

Note that we have 2 types of trunking:

Trunking with cover 45mm is a "Snap-on trunking"
Trunking with cover 75mm is a "Universal trunking"

This new trunking will allow the universal direct clips of all the mechanisms 45x45 of the market

Perforation of the body of the trunking.

Fixing by:

- wall plugs for immediate fixing (without screw nor nail ref. 30899)
- DLP rapid wall plug ref 0 308 97 (for 10mm maxi plasterboard walls at least 20mm away from the concrete surface)
- screw, nails...

Cut out using a saw (standard hacksaw)

Possibility of adapting separation partition.
