

## IP44 tile floor boxes

Cat no(s) : 0 896 04 - 0 896 87 - 6 896 22/23 - 6 896 57/58 -  
6 896 62

### CONTENTS PAGE

1.Range	1
2.Installation	2-4
3.Technical characteristics	5-6
4.Material characteristics	6

### 1. RANGE

Tile floor boxes let you:

- Provide power and data supply to your workstations via the floor
- Have an ideal solution for a concrete floor
- Install tiling of different thicknesses and other floor coverings
- Fit mounting supports for Mosaic wiring devices.

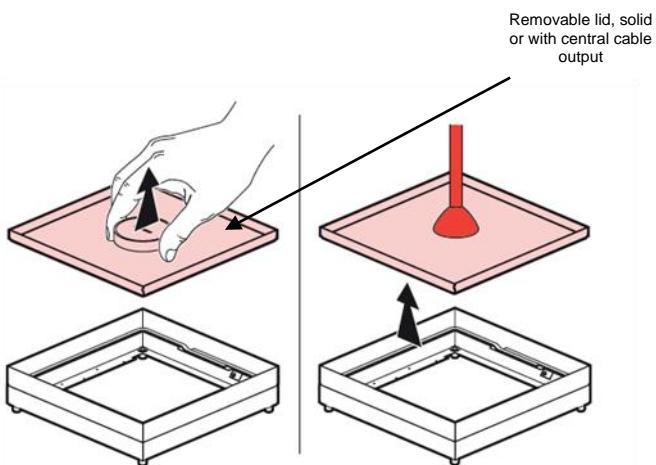

The range covers 2 products:

- IP 44 version with removable lid
- IP 44 version with removable lid equipped with a central cable output

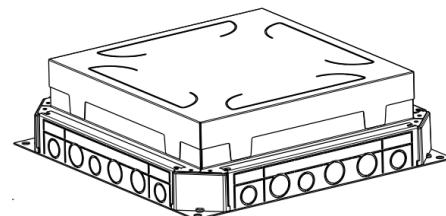

References	Description
0 896 04	Flush-mounting box
6 896 22	IP 44 tile floor box (tiling 18 to 24 mm thick)
6 896 23	IP 44 tile floor box with central output (tiling 18 to 24 mm thick)
6 896 58	Mounting support for 8 horizontal modules
6 896 62	Solid support (blanking plate)
6 896 57	Mounting support for 8 vertical modules
0 896 87	Cable exit accessory

### 1. RANGE (cont.)

Floor boxes cat. nos 6 896 22/23

Flush-mounting box cat. no 0 896 04

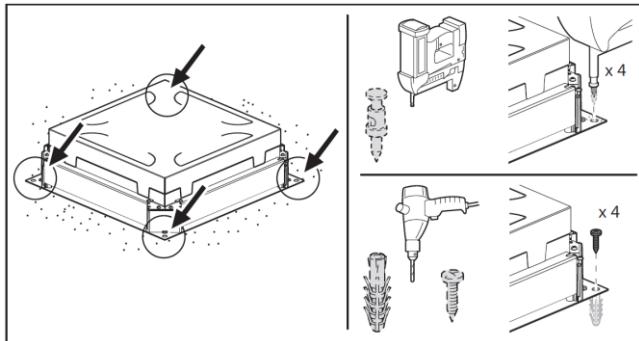

## 2. INSTALLATION : One installation method

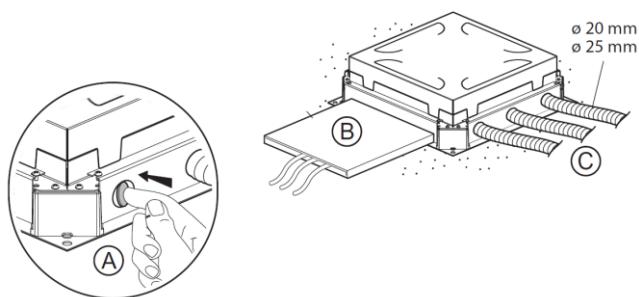

In concrete only, using flush-mounting box, cat. no 0 896 04. Allow for a height from 65 to 90 mm.

### 2.1 Installation of flush-mounting box, cat. no 0 896 04

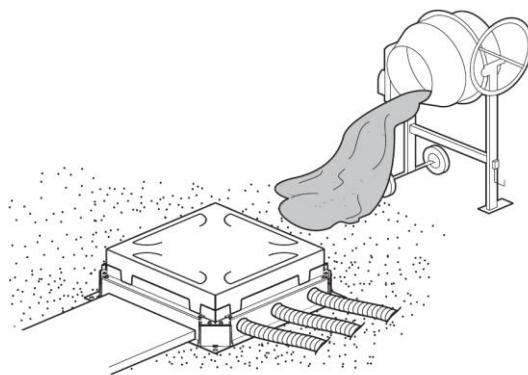

1) Secure the flush-mounting box to the slab at all four corners, by anchoring or dowelling

2) Install ducts before pouring the slab

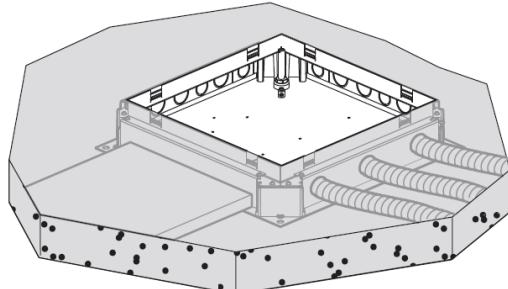

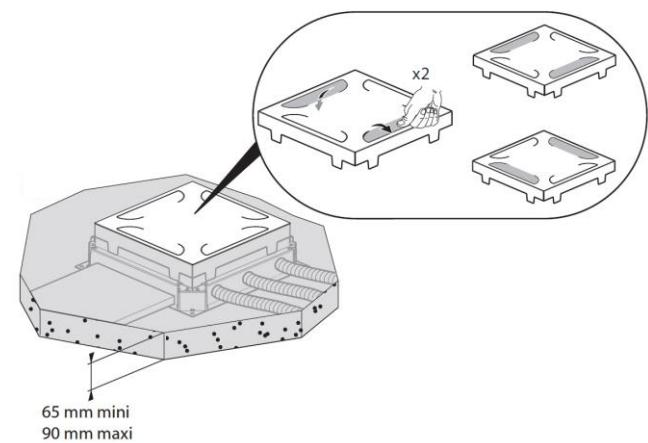

3) Pour the concrete slab

## 2. INSTALLATION (cont.)

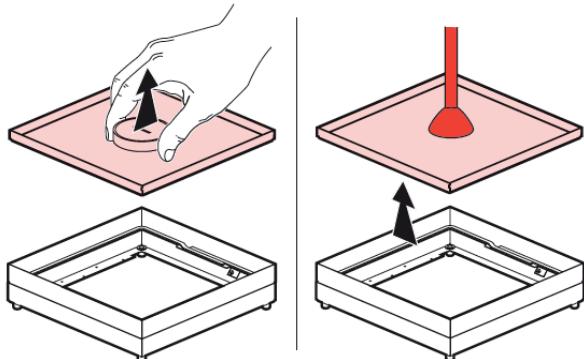

4) When the concrete slab is dry, remove the mask from the top of the flush-mounting box before fitting the floor box

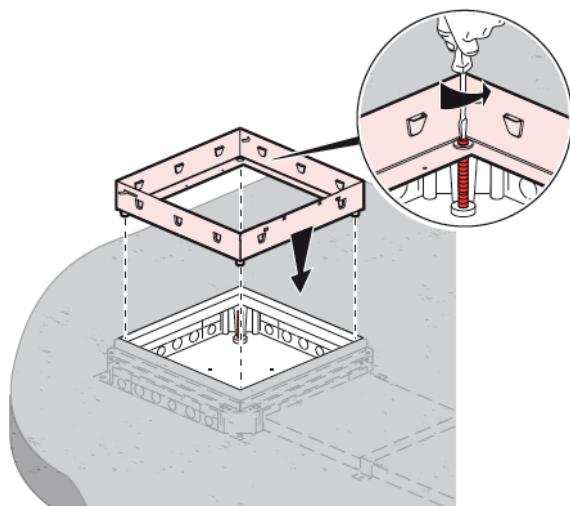

## 2. INSTALLATION (cont.)

### 2.2 Installation of tile floor boxes cat. nos. 6 896 22/23 with removable lid

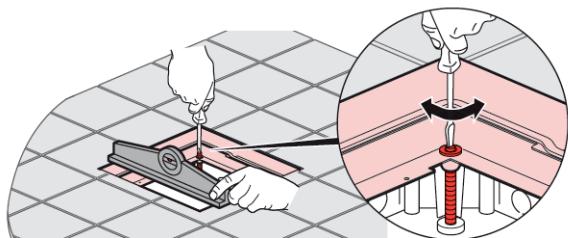

1) Remove the lid from the floor box.

2) Position the floor box frame on the flush-mounting box.

3) After laying the tiles, level the floor box frame with respect to the finished floor surface.

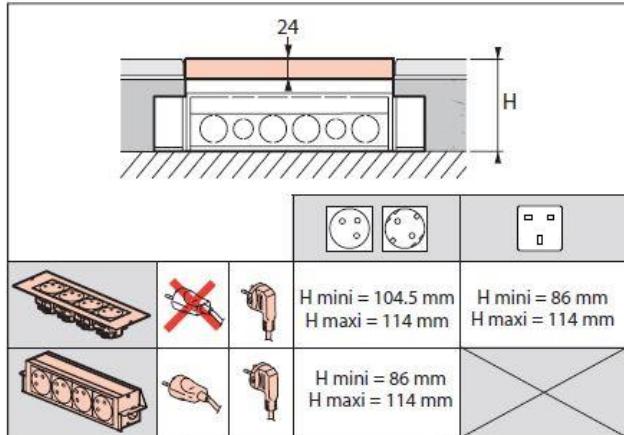

## 2. INSTALLATION (cont.)

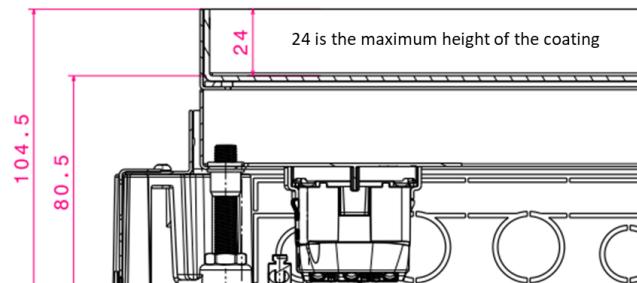

### 2.3 Installation of wiring devices

2.3.1 Types of installation:

- Fixed horizontal
- Fixed vertical

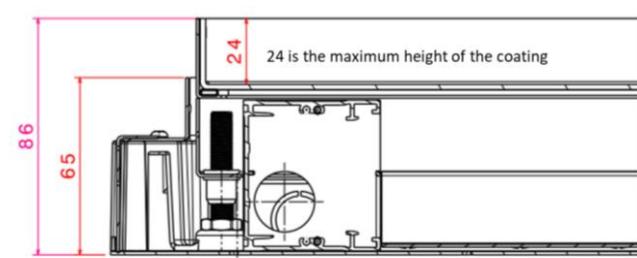

Box cross-section with height specification for horizontal support installation

Min. concrete height 80.5 if coating (tiling + adhesive) = 24 mm  
If coating < 24 mm, concrete height = 80.5 + 24 - coating

Box cross-section with height specification for vertical support installation

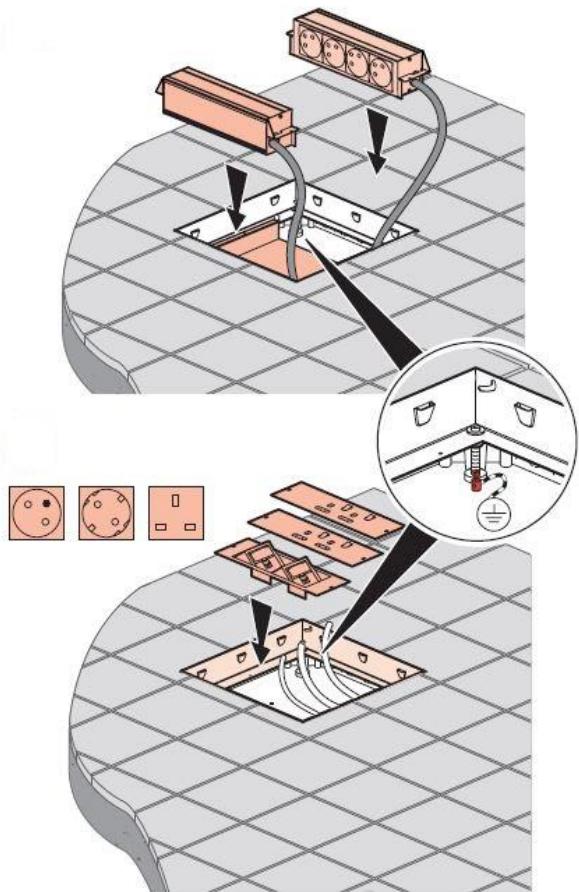

Min. concrete height 65 if coating (tiling + adhesive) > 21 mm  
If coating < 21 mm, concrete height = 65 + 21 - coating

## 2. INSTALLATION (cont.)

### 2.3 Installation of wiring devices

#### 2.3.2 Size 45 mm sockets:

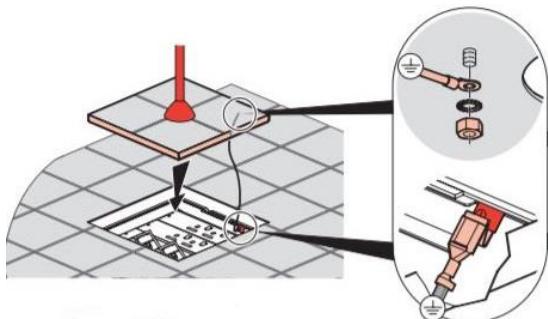

- vertical = 2 x 8 modules
- horizontal = 3 x 8 modules

#### 2.3.3 Cable exit accessory cat. no 0 896 87

### Tile floor box, cat. no 6 896 22

- Not equipped with a cable output. Requires removal of the lid during use.

## 2. INSTALLATION (cont.)

### 2.3 Installation of wiring devices

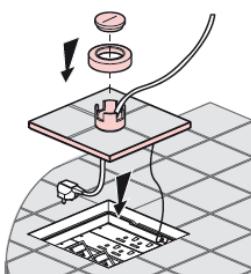

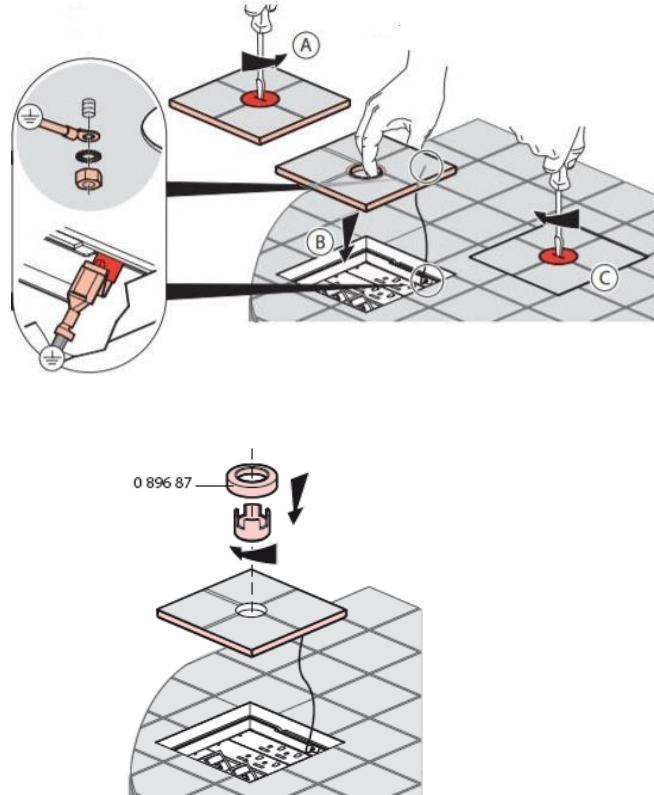

#### 2.3.3 Cable exit accessory cat. no 0 896 87

### Tile floor box, cat. no 6 896 23

- Equipped with a central threaded cable output for closing the box when sockets are in use.

Caution: In this scenario, there is no IPXX waterproofing.

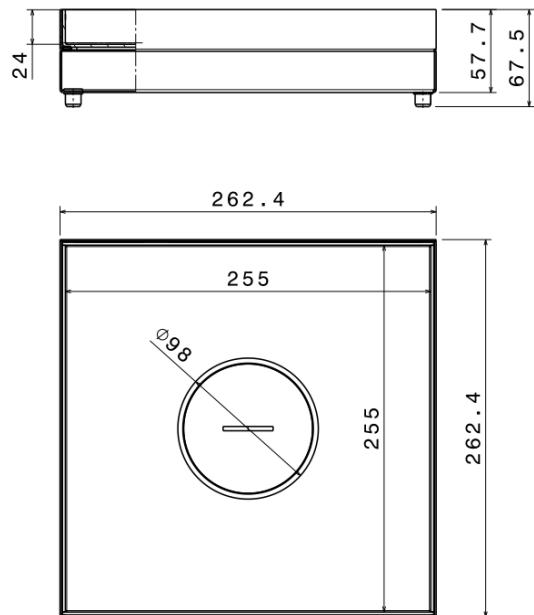

For waterproofing with socket in use, use accessory Cat. No. 0 896 87

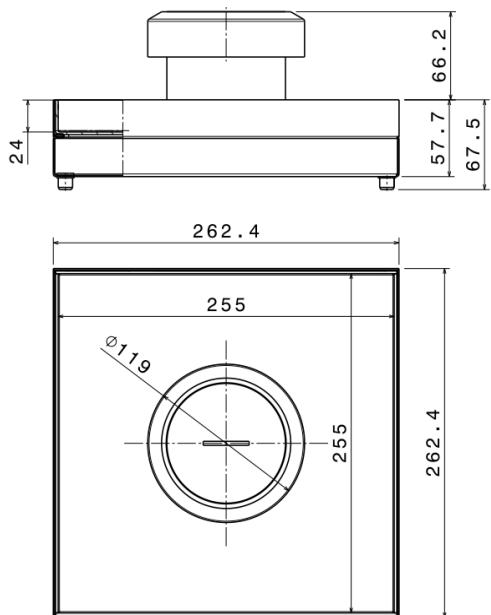

## 3. TECHNICAL CHARACTERISTICS

### 3.1 Overall dimensions

3.1.1 IP 44 tile floor box with central cable exit cat. no 6 896 23 or plain cover cat. no 6 896 22

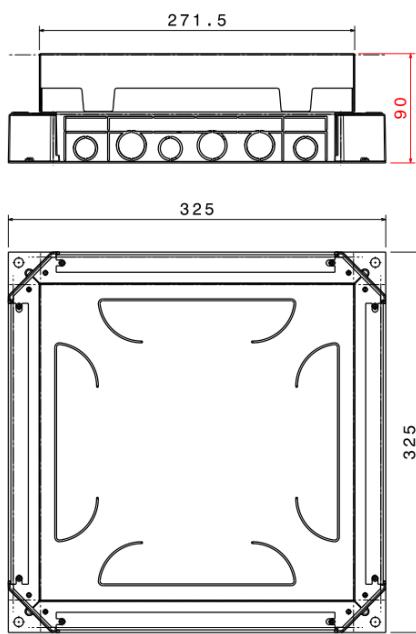

3.1.2 IP 44 tile floor box with cable output accessory  
cat. no 0 896 87 to be added (non supplied with cat. no 6 896 23)

## 3. TECHNICAL CHARACTERISTICS (cont.)

### 3.1 Overall dimensions

3.1.3 Flush-mounting box cat. no 0 896 04

## 3. TECHNICAL CHARACTERISTICS (cont.)

Classification of floor boxes and enclosures for electrical wiring devices in accordance with the IEC 60670-1 and IEC 60670-23 standards.

7.1 Nature of material	Metal
7.2 Mounting mode	Flush mounted, semi-flush mounted in non-flammable floors
	Appropriate location for installation in concrete during the pouring phase
	Floor boxes and enclosures installed in floors subject to dry treatment (Cat. No. 0 88 056)
	Floor boxes and enclosures installed in floors subject to wet treatment (Cat. No. 6 896 22/23)
7.3 Types of inlet	No inlets. The inlet openings will be created during installation
7.4 Mounting modes	Without mountings
7.5 Minimum and maximum temperatures during installation	-5°C to +60°C
7.6 Maximum temperature during the concrete pouring phase	+60°C
7.8 Arrangements to secure devices to boxes	Boxes intended to be fitted with screws
7.101 Type of lid	Enclosure with detachable lid
15.101 Ability to withstand a vertical load applied via a small surface	500 N

Safety: check that the system is earthed

Earthing arrangement: resistance less than 0.05 Ω

Impact resistance: IK 08

Resistance to vertical load according to the standard EN 50085-2-2 (flexion < 6mm) :

- **5000N** to load applied through large surface area (diameter 130mm)
- **2000N** to load applied through small surface area (diameter 11mm)

Degrees of protection provided by the floor box with lid closed: IP44.

Cleaning: do not use abrasive products or detergents.

The visible parts of the floor box must be cleaned using a damp cloth only:

## 4. MATERIAL CHARACTERISTICS

The metal floor box is made of:

- Galvanised steel (DX51D Z275 MAC)
- 304L stainless steel

The metal flush-mounting box is made of:

- Galvanised steel (DX51D Z275 MAC)
- Zamak
