1. USE

Modular shuttered 2P+E Flush socket outlets that can be joined together, for installation in floor boxes, columns, mini-columns, desktop multi-outlet extensions, trunking and flush-mounting boxes with 50 mm recommended depth.

Easy to clean and prevent accumulation of dirt.

Mosaic Link socket outlets can be added with connection accessory Cat. No. 0 771 00L.

Usage restriction:

In plastic trunking, the mechanical strength of an assembly made up of Mosaic Link socket outlets is limited to 4 recesses maximum.

Antimicrobial* socket outlets:

Products are made of silver-ion based antimicrobial* material.

This technology eliminates bacteria, fungi and viruses without creating any immunisation or resistance effects (physical, rather than chemical destruction).

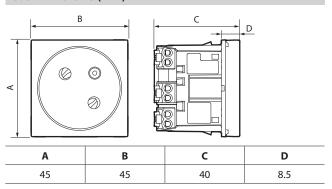

Particularly suitable for healthcare establishments (hospitals, clinics, nursing homes, laboratories, waiting rooms, etc) and more generally for areas subject to hygiene restrictions (industrial, shared and restaurant kitchens, waste, etc).

These products offer an additional way of ensuring the non-proliferation of bacteria, fungi and viruses without interfering with cleaning protocols.
