4. DISMANTLING

The plates can be dismantled by inserting the tip of a screwdriver in a purpose-designed notch on the sides of the plate and using it as a lever to unclip it from the fixing points.
 Once the plate has been lifted off the wall slightly, just slide your fingers between the plate and the wall to gently remove the plate.
 Take care not to pull too hard on the plate, to avoid breaking the fixing clips.

5. CONNECTION

Type of terminals : with screws
 Terminal capacity: 3 x 2.5 mm² - 2 x 4 mm² - 2 x 6 mm²
 Stripping length: 12 mm
 Compatible with flexible or rigid cables.

7. CARE

■ 7.1 Installation

To protect the products, it is essential to install them:

- once all surface coatings are completely dry,
- in a dry, non-aggressive environment,
- indoors only.

It is recommended that you install the plates only after the wall coatings have been completely finished (paint, fabrics, etc.).

■ 7.2 Instructions

Clean and dust using a soft, damp cloth (dampened with water) or wipes impregnated with a product containing less than 5% alcohol and anionic surfactant.

■ 7.3 Banned products

- solvents, various essential oils, paint, or adhesive tape,
- scouring powders (because are abrasive),
- products containing bleach,
- special products for stainless steel,
- renovators (because they often contain abrasives and chemical agents),
- splashes or fumes from floor, paint, or wood stripping products, etc.

Caution: Always test before using other special cleaning products. Any mechanical attack or foreign object (screwdriver, etc.) striking the surface of the plate would damage the finish and therefore also the surface treatment.

8. STANDARDS AND APPROVALS

Compliant with installation and manufacturing standards.
