

Plug & Play Gateway
1 991 00

The Plug & Play Gateway makes it easy to connect all connected solutions «with Netatmo» and Zigbee 3.0 lighting. It plugs into an existing power socket and simply connects to the Wi-Fi network of your internet router

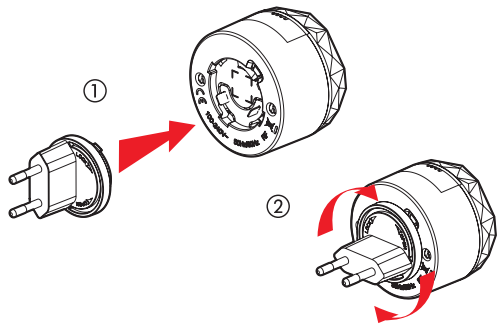

> Pack composition

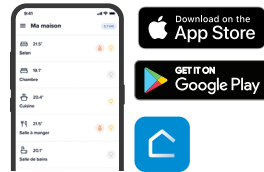

Configuration button
Plug & Play Gateway
Frequency band: 2.4 to 2.4835 GHz
Power level: < 100 mW

> Installation steps

1 Plug the gateway into an easily accessible protected socket with a maximum 16 A circuit breaker.

2 Download the Home + Control App and follow the instructions to add wired and wireless products to your installation.

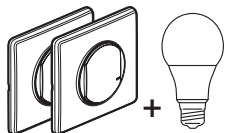

3 You are ready to control your installation via a vocal assistant and can customise your scenarios via the Home + Control App.

> Complete your installation:

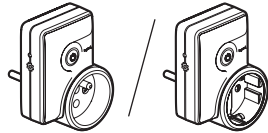

Your Legrand connected installation is scalable. You can easily add all Legrand connected solutions (to be found on legrand.com), Netatmo products or even Zigbee 3.0 certified lighting products from other brands. And so, customise your scenarios and schedules via the Home + Control App.

> Reset process

To reset your Plug & Play Gateway, press and hold the «Configuration» button on the Plug & Play Gateway until it lights up steady orange, then release the button. The Plug & Play Gateway then starts its reinitialization as well as that of the products attached to it (excluding battery-operated products), this can take several minutes. The Plug & Play Gateway will light up pink to indicate that the reset operation is complete.

Your Home + Control App will notify you of a disconnection from your Plug & Play Gateway.

This notification is likely to occur within 20 minutes of resetting your Plug & Play Gateway.

About Zigbee 3.0

Zigbee is a communication protocol that allows connected products (lighting, lighting controls, plugs, roller shutter control...) certified Zigbee 3.0 to communicate and work together. To check if a lighting is Zigbee 3.0 certified and therefore compatible with your «with Netatmo» connected starter pack look for the logo **zigbee** on the packaging or on the product's manual. You can also consult the list of all Zigbee 3.0 certified products at the following address: <https://csa-iot.org>
If you already have Zigbee 3.0 certified products that have their own connected bridge, consider resetting them to be able to use them with your «with Netatmo» connected starter pack. Refer to your products' manuals for the reset procedure
