Pack Control
7 418 00B - 7 418 60B - 7 419 00B - 7 419 60B

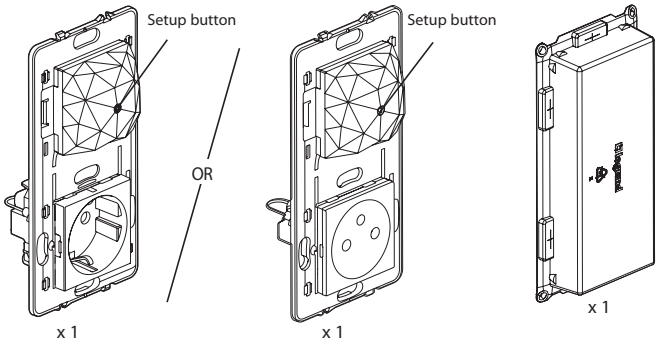

This pack allows you to start a connected installation in your home.
To complete it, add additional connected products (not included, see catalog).

Apple HomeKit : When you install the iOS mobile application, you will be asked for this code.

Unique Apple HomeKit installation code to be kept. Apple HomeKit installation code also available on the device.

Code HomeKit

Pack contents

Frequency bands: 2.4 - 2.4835 GHz - Power level: < 100 mW

LE17269AA

1 Necessary safety precautions

1 Switch OFF the power at the main circuit breaker.

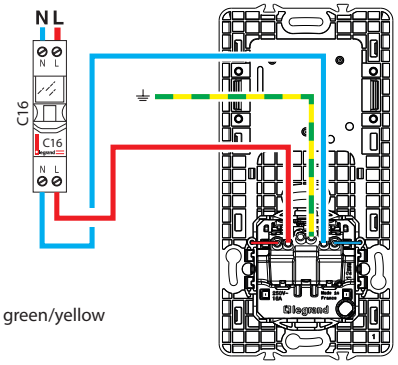

2 Make sure that the power is off before continuing with the installation.

2 Install the Pack Control

Wire the Pack Control

2.5 mm² rigid wire (recommended)

16 A - 230 V~ 3680 W maxi cos Φ 0,8

N (neutral) = blue
L (live) = any except blue and green/yellow
⏚ (earth) = green/yellow

Install the Pack Control in place of the selected standard power outlet. It is compatible with standard flush-mount boxes with a depth of 40 mm, and can be fixed using claws or screws.

If there is an Internet router in the home, use a smartphone to check if the WiFi signal is strong enough in the chosen place.

Or

If there isn't a router yet, choose a place near a fiber or telephone socket which will be used for the router.

When installing the Pack Control, you must add additional connected products that are not included in this pack (see catalog).

3 Power the Pack Control

Mandatory installation steps

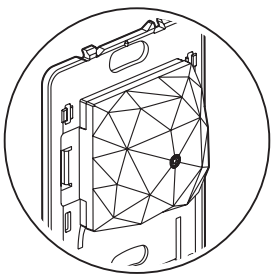

ON

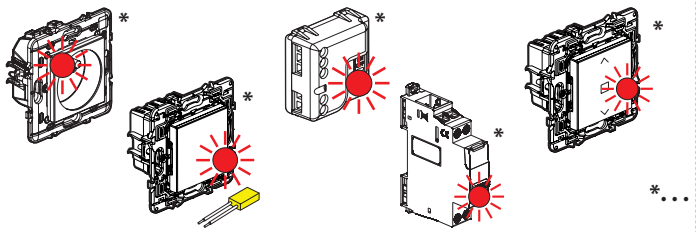

Turn the power on at the main circuit breaker

It is essential to power all wired products simultaneously.

When restarting, the Pack Control briefly lights up white and then turns off.
It is now ready for conguration.

The indicators on the products you have wired light up red.

*Other functions are available, consult our online catalogs or contact our sales network.

4 Configuring your Pack Control and installed products.

Solution1:
For quick configuration (with App), without internet access

➡ Use the **Home + PRO** app

Download the **Home + PRO** app and follow the instructions to set up your installation WITHOUT internet access

GET IT ON Google Play | Download on the App Store

Solution 2:
For full configuration (with App), if internet access is available.

➡ You can use the **Home + Control** app

Download the **Home + Control** app and follow the instructions to access more settings: scenario setup action schedules or automation

GET IT ON Google Play | Download on the App Store

You are now ready to control your installation and personalize your scenarios via the **Home + Control** app or your voice assistant.

works with Google Home | Works with Apple Home | works with alexa

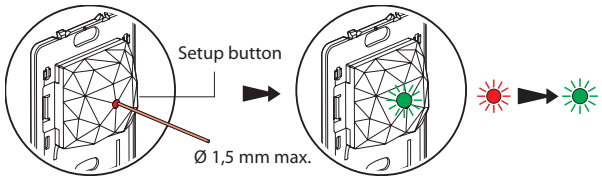

4 Configuring your Pack Control and installed products *(continuation)*

Solution 3:

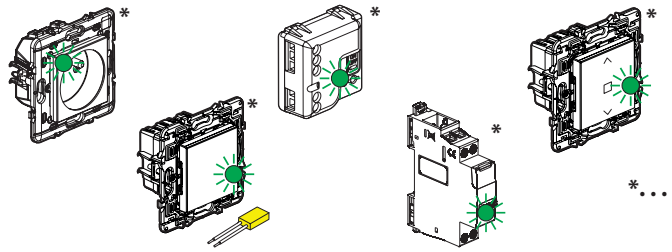

For basic configuration using the Pack Control (without App).

From the Pack Control:

1 Use an insulated pin to press the Gateway setup button until the LED lights up green, then release.

2 The indicator lights on the products that you have wired will turn green one by one.

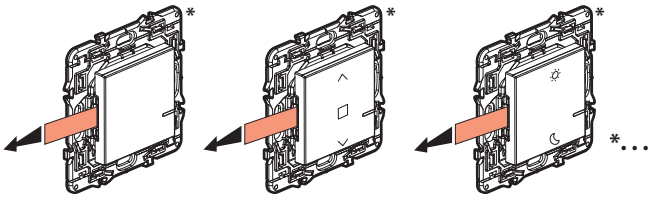

Note: If some products do not turn solid green, repeat this step 1

*Other functions are available, consult our online catalogs or contact our sales network.

Pairing a wireless control (not included in this pack):

Remove the protective strip from each of the wireless controls.

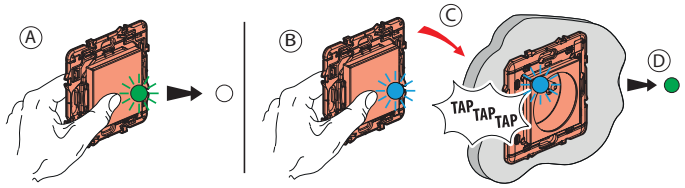

Pairing wireless controls:
Follow the instructions in your installation app or directly with the Pack Control as shown in the example below.

*Other functions are available, consult our online catalogs or contact our sales network.

Example of pairing a wireless control with the Pack Control:

⚠ Make sure that the indicators on the wired products remain solid green. If not, repeat Step 4 : Solution 3.

Ⓐ Briefly press each of the wireless controls to activate them. The indicator lights will flash green and then switch off.

Ⓑ Keep pressing the button on the wireless control and tap the socket you want to control 3 times with this control

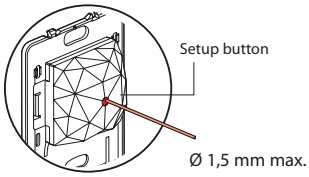

Ⓒ The two indicator lights on the product will flash blue rapidly.

Ⓓ The indicator lights on the two products will briey turn blue, and then the light on the wiref product will turn green again and thr light on the wireless control will switch off. The pairing was successful.

5 6

5 Complete the configuration

To complete your installation, briefly press the Pack Control setup button using an insulated pin.

All the indicator lights on the products will switch off.

Make the most of your Control gateway through the **Home + Control** app: Enhance your comfort by automating the control of your roller shutters with personalized schedules.
Optimize your lighting with lifestyle scenarios such as «Welcome Mode» or «Movie Night», and control your Zigbee-compatible lights, bulbs, and LED strips to create the perfect style and atmosphere in your home.
Secure your home while you're away with presence simulation scenarios.
Easily monitor your energy consumption through the **Home + Control** app.

⚠ **Safety instructions**

This product should be installed in compliance with installation rules, preferably by a qualified electrician. Incorrect installation and/or incorrect use can lead to risk of electric shock or fire. Before carrying out the installation, read the instructions and take account of the product's specific mounting location. Do not open up, dismantle, alter or modify the device except where specifically required to do so by the instructions. All **Legrand** products must be opened and repaired exclusively by personnel trained and approved by **Legrand**. Any unauthorised opening or repair completely cancels all liabilities and the rights to replacement and guarantees. Use only **Legrand** brand accessories.
