Details for Pulse Output Meters

Model[1]	Modbus Addres[1]	Position[2]
Counter model	Modbus address of the Concentrator	Corresponds at the input number of the Concentrator on which the counter is connected!

Details for Charging Stations

Model[1]	Modbus Addres[1]	Side[3]	Phase[4]
Charging station model	Modbus address of the Charging Station	Side of the Charging Station: Left or Right [only for old range]	Phase at wich the Station is connected (only for single-phase Stations)

Details for "Exclude from totals"[6]

Use this option if you want that consumptions of the selected device is not included in the pages "Total" and "Partial" of the menu "Consumption."
This consumptions will always be displayed on the page "Details".

Details for Protection Devices

Supply[5]

To ensure correct measurement of various electrical quantities, it is necessary to indicate the Supply direction of the protection device:
- device supplied from the top → Upstream
- device supplied from the bottom → Downstream

Details for Master/Slave function [7]

Modbus Address (fixed value equal to 247) - Indication of the virtual device type:
247 - 1XXXX = Positive active energy of the Device with ID = XXXX
247 - 2YYYY = Positive active energy of the Load with ID = YYYY
247 - 3ZZZZ = Positive active energy of the Measure Group with ID = ZZZZ
247 - 29999 = Total Positive active energy of all Electrical Loads

LEGEND
[1]Required Parameters
[2]Required Parameter only for Pulse Output Meters
[3]Required Parameter only for Charging Stations with two sides of the Old Range
[4]Required Parameter only for Charging Stations single-phase
[5]Required Parameter only for EMS CX^3 ,DX^3 RCD add-on modules, DPX^3 and DMX^3

NOTE: for more details refer to the user manual

[6]Optional parameter <u>only</u> for measuring devices
