

## VITP7-4SC | Scene select plates

Scene selection allows the recall of pre-programmed lighting levels to create different moods or to suit different uses within an environment.

When used in conjunction with LCMs and suitable dimming luminaires different lighting scenes can be achieved for applications such as classrooms and meeting rooms.

This product is compatible with the VITP7 Vitesse Plus family of controllers such as the VITP7-MB-DD plug and socket version or VITP7-HW hardwired controllers.

The connection to the controllers is made via an easy EBS-PC RJ45 plug and socket cable arrangement.

The unit takes low power from the controllers and are SELV environment safe.

The majority of the logic of control is setup within the simple setup of the Vitesse Plus controllers but minimal configurations of time-outs and target light levels can be programmed using infra-red signals via the UNLCDHS LCD handset.

### Dimensions (mm)

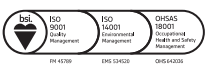

### Installation

Install the scene plate in a British standard flush box with a depth of at least 25mm.

Wire the plate using a CAT5 cable with the one end stripped.

## Technical Data

Part Code	VITP7-4SC-W	VITP7-4SC-SS
Weight	0.200kg	0.200kg
Compliance	 EMC-2014/30/EU, LVD-2014/35/EU	EMC-2014/30/EU, LVD-2014/35/EU
Colour	White	Stainless steel
