

# IMPROPER CERTIFICATE VALIDATION IN THE BTICINO DOOR ENTRY FOR HOMETOUCH ANDROID APPLICATION

Reference : LCA-2023-001

**Date** : 2023-06-02

### Summary

Legrand is aware of a vulnerability in the Door Entry for HOMETOUCH Android application.

An attacker who successfully exploited this vulnerability could eavesdrops the communication between the mobile application and the cameras.

## Affected products and versions

Product	Version
Door Entry for HOMETOUCH	All versions prior to 1.5.1

## Vulnerability details

CVE ID	CVE-2022-46496
CVSS v3.1	Base Score 5.9 (Medium) – AV:N/AC:H/PR:N/UI:N/S:U/C:H/I:N/A:N
CWE	295 – IMPROPER CERTIFICATE VALIDATION

The application does not fully validate TLS certificates when connecting to <a href="www.myhomeweb.com">www.myhomeweb.com</a>. This vulnerability allows an attacker to perform a MitM attack, enabling them to capture user login credentials and SPI login / password information. This attack is particularly feasible in public or open Wi-Fi environment, making it relatively easy to execute.

#### Remediation

Legrand recommends installing the last version of the Android application at earliest convenience.

# General security recommendations

We strongly recommend the following (non-exhaustive) cybersecurity best practices:

- Keep your smartphone and installed applications up to date in terms security patches.
- Remove all unused applications.

# Acknowledgement

Legrand thanks Bruno Morisson for helping to identify the vulnerabilities and protecting our customers.
